@pulp\_platform

**ETH** zürich

# What is FreeRTOS

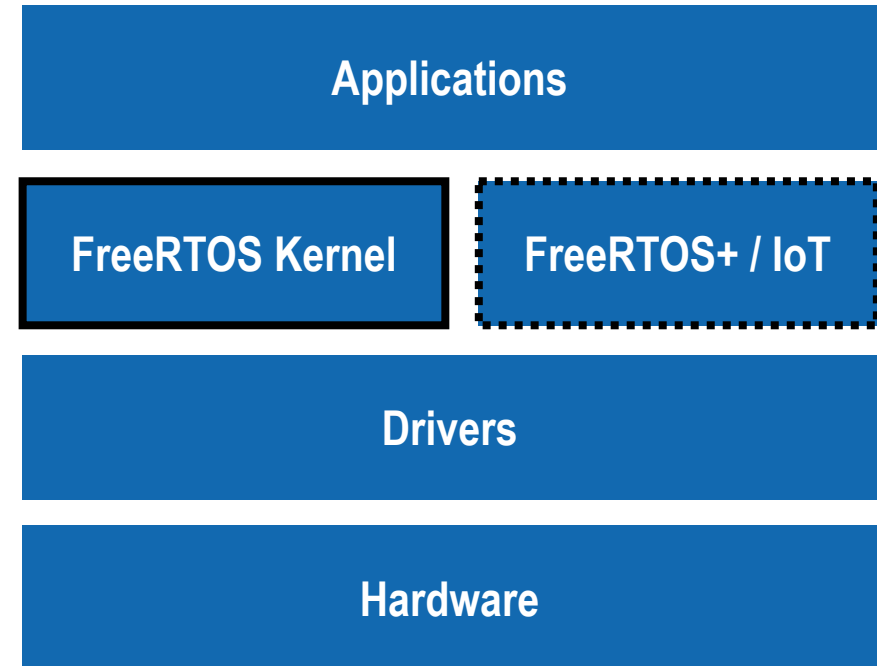

- **Real-time operating system for microcontrollers**

- “market-leading real-time operating system for microcontroller”
- **Kernel** + optional libraries
- Supports lots of architectures
- Drivers out-of-tree (!)

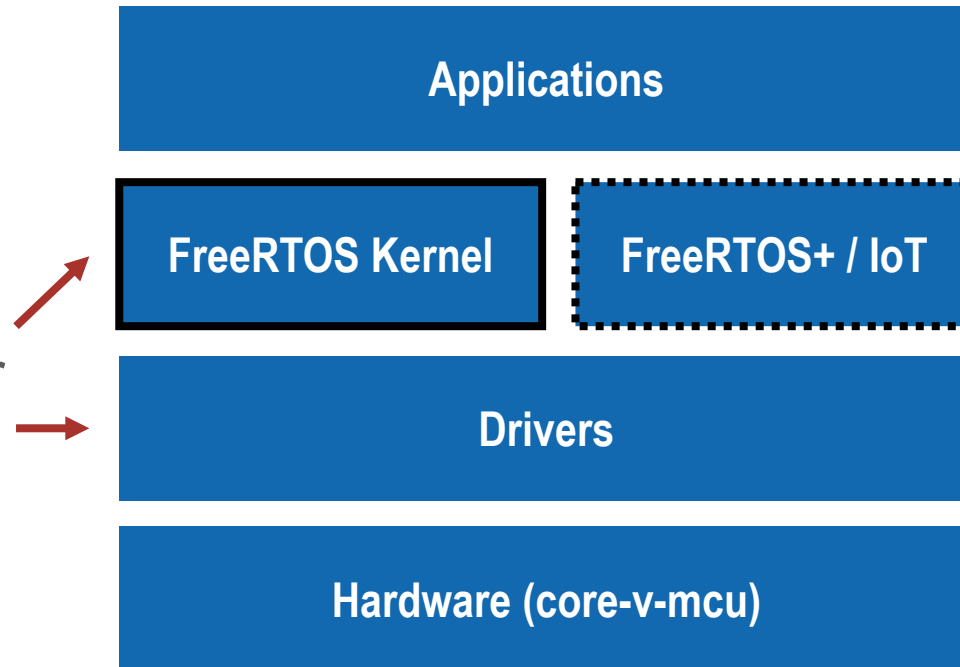

- **Development**

- Amazon is upstream since 2017
- Github
- **MIT licensed**

# Minimal FreeRTOS

- Build Flow
- Interrupt controller
- Periodic Timer

- C-Runtime (crt0.S, linkerscript)
- Hardware initialization code

# Future Directions
